

July 2, 2020

Dear Valued Customer:

We are pleased to announce today that Merck Animal Health has completed its previously announced acquisition of the U.S. rights to SENTINEL® FLAVOR TABS® and SENTINEL® SPECTRUM® Chews in the Companion Animal category.

Comprehensive parasite protection is an essential part of canine overall health and well-being. The BRAVECTO® product line, which are our extended duration flea and tick protection products, and the SENTINEL® branded products, which control all common intestinal parasites, provide an attractive opportunity for broad-spectrum, year-round comprehensive internal and external parasite protection for dogs. These complementary products will protect against seven common, harmful parasites that affect dogs inside and out -- ticks, multiple stages of fleas and four common intestinal parasites -- and will prevent heartworm disease.

Our priority is business continuity for our customers, including our new customers that we have gained through this product acquisition.

We will continue to focus on doing work with the same dedication and passion that we have always shown to you. Our commitment to you remains steadfast, as we will deliver the high-quality products and level of service that you have come to expect.

We are honored to have you as our customer and value this relationship. If you have any questions moving forward, please contact us.

Sincerely,

Joanna Burchett  
Territory Manager  
Merck Animal Health
